Details

Based in
Breda, The Netherlands

Expected graduation
June 2027

Languages

Dutch, fluent
English, fluent

Skills

Languages
C++, Python, GLSL

Engines and libraries
Unreal Engine (C++ and Blueprints), ImGui, Rive

Workflow
Perforce, Git, Jira, Scrum

Areas
Gameplay programming, UI programming, tools development, AI and physics

Flemming van der Sande

Gameplay and tools programmer, student at BUas

I study game programming at Breda University of Applied Sciences and work mostly in C++ and Unreal Engine. I like working in a team and building systems that designers and artists can use without needing a programmer. I'm looking for an internship in gameplay or tools programming starting early 2027.

Projects

Spirit Cleansers, released on Steam — 2025 to 2026

Nominated for Best Student Game, Dutch Game Awards 2026

UI, tools and gameplay programmer · team of 21 · 24 weeks · Unreal Engine, Blueprints

- Built the combat HUD, the dialogue system, and the title, pause and settings menus for a turn-based strategy game.
- Made data-driven tools for designers: a dialogue command system and an onboarding system edited through data tables.
- Fixed a render target issue found in profiling, which brought frame time from 12.5 ms to 7.5 ms before release.

City Generator, Unreal Engine plugin — 2025

Solo · 8 weeks · C++, Unreal Engine 5

- Plugin that generates roads, intersections, sidewalks and buildings at runtime from a road graph.
- Finds city blocks by walking the graph, subdivides them recursively and generates the meshes with UVs.

Bloom, student game on itch.io — 2025

Gameplay programmer · team of 14 · 8 weeks · Unreal Engine, Blueprints

- Built the inventory, shop, creature trading, diegetic UI and audio integration.

Terrain Generator — 2024 to 2025

Solo · 8 weeks · C++, GLSL, ImGui

- Perlin noise terrain with biomes, height and slope based texturing, and an ImGui editor to change biome data while it runs.

Voxel Ray Tracer — 2023 to 2024

Solo · 8 weeks · C++

- CPU ray tracer with DDA grid traversal, shadows, reflections, glass refraction and an HDR skydome.

Education

Kristiania University College, Oslo, Norway — Autumn 2026

Exchange semester, Data Science 3

Breda University of Applied Sciences, Breda — 2023 to June 2027

HBO, Creative Media and Game Technologies, programming. Specialisation in C++: gameplay programming, AI, physics and tools development.

Jacob-Roelandslyceum, Boxtel — 2017 to 2023

HAVO, Nature & Technology. Mathematics, physics, chemistry and computer science.

Work experience

Fresh department employee, Albert Heijn, Den Bosch — Jun 2022 to Jan 2026

- Responsible for the fresh department: product display, hygiene and restocking.
- Helped customers and worked as part of a team during busy periods.
